

30-Day Health Snapshot

February 9 – March 10, 2026 | Prepared for provider review

Blood Pressure

Three readings recorded over the 30-day period. Note the 22-day gap between February 10 and March 4.

Date	Systolic	Diastolic	Pulse	Notes
Feb 9, 5:39 PM	132	91	74 bpm	Stage 1 hypertension range
Feb 10, 8:17 AM	128	88	71 bpm	Elevated / Stage 1 boundary
Mar 4, 7:52 PM	125	85	68 bpm	Elevated range

All readings in the elevated-to-Stage 1 range. Patient is on Lisinopril 60mg and Metoprolol 25mg daily. Sparse data — only 3 readings in 30 days.

Weight

Three manual readings recorded. Trend is upward over the period.

Date	Weight	Change
Feb 9	180.7 lbs	—
Feb 24	183.3 lbs	+2.6 lbs
Mar 8	185.1 lbs	+4.4 lbs total

+4.4 lbs over 28 days. Worth discussing whether this is fluid retention, dietary, or medication-related.

Data Gaps

The following data types were requested but returned no data for the 30-day period. The patient wears a Garmin Fenix 6S, so heart rate, sleep, and stress data should normally be available. This likely reflects a device sync issue rather than absence of data.

Data Type	Expected Source	Status
Heart rate	Garmin Fenix 6S (continuous)	No data returned
Sleep summary	Garmin Fenix 6S (nightly)	No data returned
Sleep stages	Garmin Fenix 6S (nightly)	No data returned
Stress	Garmin Fenix 6S (continuous)	No data returned

Current Medications

Prescription medications currently active in the tracking system. Dosage frequency is not yet captured for all items.

Medication	Dosage	Notes
Lisinopril	60mg	ACE inhibitor (hypertension)
Metoprolol	25mg	Beta blocker (hypertension/heart rate)
Tramadol	50mg	Pain management
Robaxin	500mg	Muscle relaxant (methocarbamol)
Prilosec	40mg	PPI (omeprazole)
Singulair	10mg	Leukotriene inhibitor (montelukast)
Cromolyn	5mg liquid	Mast cell stabilizer
Zofran	4mg	Anti-nausea (ondansetron)
Antivert	Not recorded	Anti-vertigo (meclizine)

PRN medications (Norco, Paxlovid, Tamiflu, Coricidin, Lidocaine cream, Salonpas) also on file but listed as-needed.

Medication Schedule

Medications are organized into timed bundles. Exact clock times for each bundle are not yet configured in the system.

Bundle	Contents
Wake Time Prescriptions	Lisinopril (2 tabs), Metoprolol (1), Tramadol (1), Robaxin (0.5)
Tea Time Prescription	Robaxin (0.5), Tramadol (1)
Bed Time Prescription	Tramadol (1), Robaxin (1)

Key Supplement Stacks

Bundle	Contents
Wake Time Vitamins	5-HTP (100mg), multivitamin, iron bisglycinate (25mg), vitamin K (100mcg), boron (3mg), vitamin C (1000mg)
Thrice Daily Aminos	Creatine (1500mg), L-tyrosine (500mg), acetyl-L-carnitine (500mg), fish oil (2 caps), taurine (1000mg), glycine (1000mg), L-glutamine (500mg), phosphatidylserine (200mg), NAC (600mg)
Thrice Daily MCAS	Quercetin (500mg), Famotidine (10mg), Allegra/fexofenadine (45mg), Luteolin (100mg)
Sleep Induction	NAC (5 caps/3000mg), magnesium (200mg), L-theanine (2 caps/400mg), glycine (3 caps/3000mg)

MCAS = Mast Cell Activation Syndrome protocol. Allegra appears twice in the system under brand and generic names (fexofenadine).
